

The Shape of Things

We invite you to make some birds and fish- or any other animal that comes to mind.

YOU WILL NEED

- Scissors
- Glue
- Colouring pencils, paints or pens
- Plain paper or card to use as a background
- The shape template sheets (next page)

ACTIVITY

Cut out the triangle shapes (see attached page) and arrange some of them into a bird like shape. You can cut the triangles into smaller or half shapes but try to keep to the triangle shape. When you are happy with your bird, make a little sketch of the arrangement so you know what you designed, then paint or decorate each part. When dry, glue them in place.

Now have a go at the circles and try making a fish!

Tip: If you don't want to cut out then draw around objects of different sizes on your page instead.
